Career and Life Planning Education Programme Plan 2021-22

I. SWOT Analysis

● **Strengths**

- Students in senior forms are relatively keen on careers planning and guidance.
- Most parents are well-educated and financially sound. The PTA and parents are also supportive.
- Parents and students are aware of the need for careers experience exposure.
- With over 146 years of history, SJC has a lot of alumni who are very successful and outstanding in various professions. We have a vast treasure of human resources, which we can tap to provide students with mentoring and assistance for further education and careers opportunities. SJC alumni are enthusiastic and the Old Boys' Association is working closely with the school. Projects like the Mentorship Program organized by the OBA are expanding both in terms of number of mentors and participating students.
- The setting up of professional groups like the Legal Chapter, Financial Chapter, Creative Chapter for advertising and Medical Chapter by the OBA provide encouragement, role model, scholarship and experience sharing opportunities for our students with careers aspiration similar to their fellow Josephians.
- The Careers Team has accumulated certain experience in career counseling. Teachers have built rapport with students.

B. Weaknesses

- Students are often over-confident in getting excellent examination results and do not feel the need for early career / education planning. Students might miss some better opportunities for their further studies because they lack sufficient pre-planning.
- Parents are often too domineering in their children's further education and careers planning. This might affect personal development and individual fulfillment of aspirations in the students.
- A few team members have completed the EDB careers guidance certificate course (100 hours).
- Some students have high aims which do not align with their ability.

C. Opportunities

- The Senior Secondary Curriculum includes Career-related Experiences as part of the Other Learning Experiences. Some career guidance / further education material could have been incorporated within the school curriculum.
- Parents and students will be more aware of the need for careers experience exposure.
- School may consider putting more resources to cater the need for increasing students' careers exposure.
- A more comprehensive life planning education and career guidance services can be provided to junior form students.
- With the CLP Grant, a solid foundation has been laid on enhancing the capacity of the Career Department to implement the life planning education in previous years.
- This year, we will continue to cooperate with ARCH education. ARCH education is going to assist our school in holding talks, workshops

and interviews with students (especially S3 to S6 students). The aim of this program is to assist students to further their studies in top universities in UK.

- Workshops (in the form of luncheon) will be held regularly during summer timetable. Different guest speakers working in different fields will give inspirations and assist S6 students to write their JUPAS essay.

D. Threats

- There is drastic change in the admission criteria of students by local universities. Similar situation is found in students furthering their studies in foreign countries. Students need new strategies for careers / further education guidance under the education reform.
- The number of students taking DSE is constantly dropping which directly affect the results of public examination and JUPAS offer.
- The career and life planning education exerts great pressure on the members of Careers Team and form teachers. Teachers are required to attend structured training on life planning education.
- There have been changes in team composition in recent years. It may cause uncertainties on the delivery of career counseling service.

II. Objectives

It is hoped that with the provision of effective careers guidance and life planning education, students can make wise and responsible career choices in accordance with their interests, abilities and orientations, and can continue with their life-long career development.

We aim:

- A. To incorporate career and life planning education into school curriculum and activities.
- B. To assist students to make wise and informed career decisions with reference to students' interests, abilities and orientations.
- C. To raise students' awareness of the importance of life-long career development planning.
